WHO WE ARE

Italian manufacturing company of superior quality, specialized in assembling connectors on optical fiber cables.

We work with the leading operators and installers in the telecommunication market.

WHAT MAKES US DIFFERENT

- innovative production department for assembling and testing optical connectors
- engineering department for design and development of new products and solutions
- consulting and training in the optical fibers field

We base our philosophy on innovation, speed and customer care.

MISSION

We work with passion to create faster connections between people, places, ideas and values.

VISION

Representing the excellence and values of Made in Italy worldwide.

VALUES

Quality, Innovation, Expertise, Flexibility, Collaboration, Commitment, Honesty.

OUR PRODUCTS

We offer a full range of high-quality products and equipment for any fiber optics application.

Our production department is made of five production lines for connector assembling and laboratories for environmental and mechanical testing.

Our target markets:

- Telecommunications
- Data center
- Broadcasting
- Military

FIBER OPTICS CABLE ASSEMBLY

- Fiber Optic Connector
- Standard Patch Cord
- Armoured Patch Cord
- Pigtail
- Coloured Pigtail Kit
- Breakout Cable
- Breakout Armoured Cable
- Minibreakout Cable
- Dielectric Loose Tube Cable
- Armoured Loose Tube Cable

FIBER OPTICS MANAGEMENT

- Outdoor Optical Wall Box
- Indoor Optical Wall Box
- Fiber Optic Enclosures
- Patch Panel
- Splice Tray
- Patch Cord Management
- Optical Frame 144 F.O. 3M
- Optical Cable Duct
- Fiber Optic Rack

ADAPTORS ATTENUATORS

- Simplex Adaptors
- Duplex Adaptors
- Quad Adaptors
- Hybrid Adaptors
- Attenuators

FIBER OPTICS INSTRUMENTS

- Fusion Splicer
- Cleaver
- Fusion Splicer Accessories
- O.T.D.R.
- Fiber Optic Launch Box
- Laser Source - Power Meter
- Ethernet Media Converter

FIBER OPTICS TOOLS

- Fiber Optic Tools
- Fiber Optic Cleaning Kit
- Visual Fault Locator
- Fiber Optic Inspection Microscope
- Consumables
- Copper Patch Cord

FTTX

- Optical Network Unit
- Adaptor Shutter
- Splice On Connector
- FTTx Cables
- Splitter - PLC
- FBG

“ WE BELIEVE IN **INNOVATION**
AND **HUMAN VALUES**
AS THE BEST INVESTMENT
FOR THE **FUTURE** ”

DIFFERENTLY CONNECTED

R&D

Research and Development has always been an essential part of our corporate identity.

In 1985 we created our first portable microscope for optical connector inspection.

Thanks to internal expertise and strategic partnerships with universities, we still offer innovative solutions for optoelectronics and micromechanics applications.

DESIGNING AND TRAINING

Our engineering department supports the customer in designing and developing customized, ready-to-use solutions.

We offer training courses for all those interested in improving their knowledge about fiber optics.

Portable microscope developed in 1985
