

MINITUBE

10/12 - 10/14

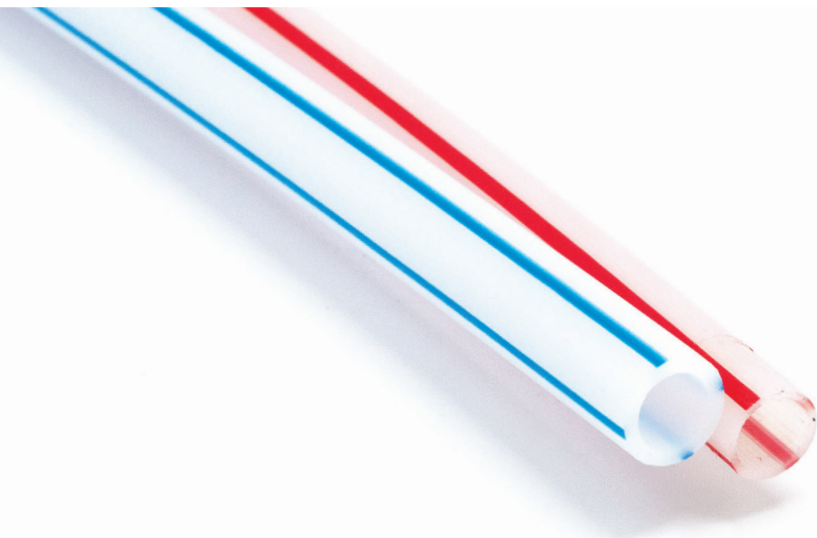

Flexible
Suitable for jetting machines
Color strips for rapid identification

MINITUBE

10/12 - 10/14

Single mini-tubes with different external diameters, used for the laying - even directly underground - of optical cables. The external surface is smooth, the internal one instead has grooves useful to ensure greater sliding of the cable inside.

TECHNICAL SPECIFICATIONS

	10/12	10/14
OUTER DIAMETER	12 mm	14 mm
INTERNAL DIAMETER	10 mm	
THICKNESS	1,00 mm	2,00 mm
MATERIAL	PE-HD	
COLORS	suitable with Open Fiber, FlashFiber and Infratel	
TENSILE STRENGTH AT BREAK	>20 MPa	
ELONGATION AT BREAK	>500%	
SOFTENING TEMPERATURE	>120 °C	
DENSITY	> 940 kg/m3	
STANDARD PACKAGING	2000 m	1500 m
